

Agar Marín Morales

She holds a PhD in Psychology from the University of Granada, a degree and a master's degree in General Health Psychology and in applied research on mental disorders from the University of Granada and Huelva, respectively. Currently, she is a postdoctoral researcher at the University of Granada, in the department of personality, assessment and psychological treatment.

More specifically, her research interests are neuroscientific variables such as morality, emotional regulation, empathy, neuropsychology, and more) in gender violence. Her most recent research interest lies in analyzing the complexity of gender violence from a multi-factorial perspective, identifying the factors that promote this type of violence.

In these areas, her doctoral thesis stands out entitled "Brain mechanisms of moral decision-making and emotional regulation, cognitive re-evaluation and empathy, in men convicted of gender violence." She has collaborated in international and national research projects, for example: neuroscientific characteristics in psychopaths and criminals; assessment of neuropsychological tests; and psychological characteristics of Ecuadorian convicts.
